

Visual Studio 2008 Windows Workflow Foundation (MS6462)

Duration: 2 days

Description

This two-day instructor-led course provides students with the knowledge and skills to build and configure a Windows Workflow Foundation (WF) solution.

Audience

This course is intended for application developers who know how to create applications in Visual Studio 2005 or 2008. The course does not require previous experience creating workflow-based solutions.

Prerequisites

Before attending this course, students should have intermediate experience developing applications by using previous versions of Microsoft Visual Studio at level 200.

Topics

CREATING AND HOSTING WORKFLOWS

This module explains how to create and host Windows Workflow Foundation (WF) workflows.

Lessons

- Overview of Windows Workflow Foundation
- Creating Sequential Workflows
- Creating State Machine Workflows
- Modifying Workflows at Runtime

Lab: *Creating and Hosting Workflows*

- Creating and hosting a simple sequential workflow
- Passing parameters into a workflow
- Creating a state machine workflow
- Hosting the state machine workflow

APPLYING CONDITIONS AND RULES

This module explains how to apply conditions and rules in a workflow.

Lessons

- Implementing Flow Control
- Defining and Executing Rule Sets

- Forward Chaining of Rules
- Changing Rules at Run Time

Lab: *Applying Conditions and Rules*

- Making Decisions
- Performing Iteration
- Defining Policies

COMMUNICATING WITH WORKFLOWS

This module explains how to communicate between workflows, host processes, and services.

Lessons

- Calling Methods on the Host Process
- Handling Events from the Host Process
- Consuming Services from a Workflow
- Publishing a Workflow as a Service

Lab: *Communicating with Workflows*

- Invoking a Method on the Host Process
- Handling Events from the Host Process

Visual Studio 2008 Windows Workflow Foundation (MS6462)

- Consuming Services from a Workflow
- Publishing a Workflow as a Service

CREATING AND CONFIGURING CUSTOM ACTIVITIES

This module explains how to create and configure custom activities.

Lessons

- Creating Custom Activities
- Creating Custom Composite Activities
- Customizing Activity Serialization
- Defining Custom Activity Layout

Lab: Creating and Configuring Custom Activities

- Creating a Custom Activity
- Validating a Custom Activity
- Developing a Custom Activity Designer
- Creating a Custom Composite Activity

CREATING AND MANAGING RUNTIME SERVICES

This module explains how to create and manage runtime services.

Lessons

- Creating a Custom Runtime Service
- Hydrating and Dehydrating Workflows
- Monitoring Workflows
- Tracking Workflows

Lab: Creating and Managing Runtime Services

- Creating a Custom Runtime Service
- Hydrating and Dehydrating Workflows
- Monitoring Workflows
- Tracking Workflows

MODULE 6: TRACK WORKFLOWS.

This module explains how to manage faults, cancellations, transactions, and compensations in a workflow.

Lessons

- Handling Faults
- Handling Cancellations
- Creating and Managing Transactions
- Creating and Handling Compensations

Lab: Managing Faults, Transactions, and Compensations

- Handling Faults
- Implementing Transactional Behavior
- Implementing Compensation Behavior
