

Planning and Managing Windows 7 Desktop Deployments and Environments (MS6294)

Length: 1 day

Description

This course is the first in a series of two Microsoft® Windows® 7 courses. This course will provide you with the basic skills needed to get started with personal computers and work with the various features, tools, and options available in the Windows 7 operating system. In this course, you will familiarize yourself with the Windows 7 environment, customize Windows 7, and manage folders and files. You will also work with simple tools and browse the Internet using Internet Explorer 8.

Audience

This course is designed for any worker, business professional or private individual who needs knowledge in operating systems and file management skills.
